PROFESSIONAL SUMMARY

Website developer with hands-on experience building responsive, accessible sites and web applications in HTML5, CSS3, JavaScript, Java and Python. Comfortable owning a build end-to-end — semantic markup, mobile-first layouts, API integration, cross-browser testing and deployment. Also writes command-line tools in Python and is fluent in the Terminal and text-editor workflow. Currently completing the Fundamentals of Web Development certificate (Illinois Tech) while freelancing and interning in front-end development.

CORE SKILLS

Languages	HTML5 · CSS3 · JavaScript (ES6+) · Java · Python · SQL
Frameworks & tools	Bootstrap · Tailwind CSS · Git · GitHub · Terminal / CLI
Practices	Responsive & mobile-first design · UI/UX · cross-browser and cross-platform testing · debugging · SEO fundamentals
Strengths	Clean maintainable code · end-to-end delivery · clear client communication

PYTHON & COMMAND-LINE SKILLS

- ✓ Use fundamental Python syntax to create a To-Do List application
- ✓ Write command-line applications with Python
- ✓ Operate confidently in the Terminal and Text Editor

Python Programming · Computer Programming Tools · Programming Principles · Program Development · Command-Line Interface · Computer Programming

PROFESSIONAL EXPERIENCE

Freelance Website Developer

Self-employed · 2023 – Present · South Africa (remote)

- Design and build responsive websites for small businesses and individuals using HTML5, CSS3, JavaScript, Java and Python.
- Deliver mobile-first layouts tested at 320 px upward across modern browsers to guarantee consistent rendering.
- Improve page speed and on-page SEO through semantic markup, asset optimisation and lazy loading.
- Build interactive UI components in JavaScript, with Java handling server-side logic on larger builds.
- Write small Python command-line utilities to automate repetitive build and content tasks.
- Manage the full project lifecycle — requirements, design handoff, build, testing, launch and post-launch support.

Web Development Intern

2022 – 2024

- Contribute front-end development to e-commerce platforms, translating designs into accurate, responsive pages.
- Write clean, reusable HTML, CSS and JavaScript that integrates smoothly with existing codebases.
- Integrate REST APIs and database connections to surface live product and order data.
- Support QA: reproduce and fix bugs, run cross-browser checks, and assist with deployment.

PROJECTS

Portfolio Website
HTML · CSS · JavaScript

Personal portfolio showcasing projects, skills and contact details. Built without a framework to demonstrate semantic HTML, CSS custom properties, responsive layout and vanilla-JS interactions.

Command-Line To-Do List
Python · CLI

Python command-line application for creating, listing and completing tasks, built to practise fundamental syntax, file persistence and a clean terminal user flow.

Online Booking System
Java · SQL

Java-based web application for scheduling services, with form validation, appointment persistence and a responsive booking interface.

Responsive Business Landing Page
HTML5 · CSS3 · Bootstrap

Mobile-friendly landing page for a business, optimised for load speed and on-page SEO, and tested from 320 px upward.

EDUCATION

Certificate in Web Development
Fundamentals of Web Development — Illinois Tech · 2023 – 2026
